Academic Positions

University of Twente **Enschede**
Post-Doctoral researcher *November 2020-November 2022*
Numerical methods for coupled port-Hamiltonian fluid-structure dynamics
ERC Advanced grant. Principal investigator: Stefano Stramigioli

Education

ISAE-Supaero **Toulouse**
PhD in Automatic Control *October 2017-October 2020*
A port-Hamiltonian formulation of flexible structures: modelling and symplectic finite element discretization.
Supervisors: Daniel Alazard, Valérie Pommier-Budinger and Denis Matignon

Université Paris Saclay/ Supélec **Paris/Toulouse**
Research Master in automatics and image processing *2016–2017*
Courses: inverse problem, advanced dynamics of flexible structures, parameter estimation.

ISAE-Supaero **Toulouse**
Double degree in aerospace and astronautical engineering *2015–2017*
Specialisation in applied mathematics and advanced automatics: multidisciplinary optimisation, high performance computing, control of flexible structures.

Politecnico di Milano **Milan**
Master in space engineering, 110/110 cum laude *2014–2017*
Courses: orbital mechanics, structural dynamics and control, thermochemical propulsion.

Politecnico di Milano **Milan**
Mechanical Engineering Degree, 110/110 cum laude *2011–2014*
Courses: finite element method, mechanical vibrations, numerical methods for engineering.

Experiences

ITA-Instituto Tecnológico de Aeronáutica **São José dos Campos**
Visiting researcher *January 2019, 4 months*
Collaboration with Flavio Cardoso-Riberio on numerical methods for port-Hamiltonian systems.

CNES-Centre des études spatiales **Toulouse**
Internship *2017, 6 months*
Analysis of dismissed satellites subjected to solar pressure to identify stable pointing configurations and periodical behaviours.

Politecnico di Milano in partnership with Danieli S.p.A **Milan**
Bachelor project *2014, 3 months*
Dynamics of a forging manipulator: kinematics modelisation and dynamic analysis. Our project was selected for a final presentation at Danieli.

Languages

Italian: native speaker

English: fluent (Toeic 965/990)

French: fluent

Spanish: intermediate

Brazilian portuguese: intermediate

Computer skills

Softwares and platforms: Simulink, Abaqus, Inventor, Solid Works, Labview

Languages: Python (especially FEM librairies: FEniCS and Firedrake), Matlab, Java, C, LaTeX

OS: Linux environment (Fedora, Ubuntu)

of port-Hamiltonian plate models. Accepted for the 24st International Symposium on Mathematical Theory of Networks and Systems, Aug 2021.

Interests

Tutor of mathematics and physics for bachelor students.

Lindy Hop, tennis, travelling, literature and cinema.
