Education

ISAE-Supaero

PhD candidate

Toulouse

October 2017-October 2020

A port-Hamiltonian formulation of flexible structures: modelling and symplectic finite element discretization.

Université Paris Saclay/ Supélec

Research Master in automatics and image processing

Paris/Toulouse

2016–2017

Courses: inverse problem, advanced dynamics of flexible structures, parameter estimation.

ISAE-Supaero

Double degree in aerospace and aeronautical engineering

Toulouse

2015–2017

Specialisation in applied mathematics and advanced automatics: multidisciplinary optimisation, high performance computing, control of flexible structures.

Politecnico di Milano

Master in space engineering, 110/110 cum laude

Milan

2014–2017

Courses: orbital mechanics, structural dynamics and control, thermochemical propulsion.

Politecnico di Milano

Mechanical Engineering Degree, 110/110 cum laude

Milan

2011–2014

Courses: finite element method, mechanical vibrations, numerical methods for engineering.

Liceo Classico Scipione Maffei

High school diploma, 100/100

Verona

2006–2011

Experiences

ITA-Instituto Tecnológico de Aeronáutica

Visiting researcher

São José dos Campos

January 2019, 4 months

Collaboration with Flavio Cardoso-Riberio on numerical methods for port-Hamiltonian systems.

CNES-Centre des études spatiales

Internship

Toulouse

2017, 6 months

Analysis of dismissed satellites subjected to solar pressure to identify stable pointing configurations and periodical behaviours.

ISAE-Supaero in partnership with LAAS

Industrial and entrepreneurial project

Toulouse

2016, 5 months

Intelligent teleoperations and optimal control for micro-drones systems (six people team).

ISAE-Supaero

Research project

Toulouse

2016, 4 months

Modular modelling of rigid multibody systems following the logic of Simscape Multibody.

Politecnico di Milano in partnership with Danieli S.p.A

Bachelor project

Milan

2014, 3 months

Dynamics of a forging manipulator: kinematics modelisation and dynamic analysis. Presented at Danieli.

Languages

Italian: native speaker
English: fluent (Toeic 965/990)
French: fluent
Spanish: intermediate
Brazilian portuguese: intermediate

Computer skills

Softwares and platforms: Simulink, Abaqus, Inventor, Solid Works, Labview
Languages: Python (especially FEM librairies: FEniCS and Firedrake), Matlab, Java, C, \LaTeX
OS: Linux environment (Fedora, Ubuntu)

Interests

Tutor of mathematics and physics for bachelor students.

Lindy Hop, tennis, travelling, literature and cinema.
